RE: 81573 - Systems Administrator

Dear Mr. Erik Reed,

It is with great interest that I submit my cover letter and resume in response to your exciting opportunity as a **Systems Administrator (81573)**. I am a creative and analytical programming student, completing an Advanced Diploma in Game Programming at Centennial College. Having reviewed your job posting, I believe my skills and knowledge are a strong fit for this position.

As a student of game programming, I have gained foundational knowledge of databases, Agile methodology and the software development life cycle with hands-on projects. I particularly enjoy collecting, organizing, and analyzing data, working in groups, programming in C# and Java, and learning about computer networking. Specific to game development, I have experience creating 2D sprites, 3D models and animations for game design and using Unity and Blender. My personal attributes include a passion for learning new technologies, team-oriented personality, and commitment to achieving project goals. I believe these skills will be valuable in the Systems Administrator role.

I understand that a trustful, respectful, and flexible working environment such as Tucows, which is a big internet company has a new software business named Wavelo. I would welcome the opportunity to be a part of this work as my focus, as an emerging programming professional, is to utilize my skills to make a positive impact on the overall organization. I also plan to attend the October 12th information session at Centennial College at 9:30 am – 11:00 am.

I am looking forward to meeting and discussing the position and my background in more detail. I believe that I would make a positive contribution to your organisation. You may contact me at (416) 700-2894 or through my email address alleychaggar@gmail.com. Thank you for considering my application.

Sincerely,

Alley Chaggar
